

TASK-3 Writing automated UI tests (tests/ui)

UI test cases:

Please create an automated test to check following conditions on every job profile we have on <https://company.trivago.com/careers/open-positions/>

- All job profile URL's should be dynamically retrieved
- Job title should have a <h1> tag
- Job Family should have a value
- Experience level should have a value
- Location should have a value
- Language should have a value
- Apply button should be present on the page
- What you'll do should have a tag
- What you'll definitely need should have tag
- What we'd love you to have should have tag
